

Dead Man's Fingers

PLANTS & ALGAE

Halosaccion glandiforme

size: 20cm (8 in) tall

Habitat: Look for this plant around the south boulders and around the Needles.

This plant is very distinctive as it looks like fingers on a rubber glove. Color ranges from yellowish to deep red with hollow sacs and forms in large clusters.

Fun Fact: squeeze one of the sacs and watch as water shoots out! Don't try this with anemones!!!
