Messages & Updates

IMPORTANT UPDATE - 3/28/24 12:07pm: The City of Cannon Beach has removed the Boil Water Advisory status effective immediately. Water is safe to drink, and you can resume your normal activities.

IMPORTANT INFORMATION - 3/27/24 7:15am: The City of Cannon Beach remains on a Boil Water Advisory as a result of the water line break yesterday. This will remain in effect until tomorrow, Thursday March 28th when we expect our water test results back from the Portland lab. Further updates will continue to be posted here. Another NIXLE alert will be issued when the Boil Water Advisory has been lifted.

Thank you for your patience during this safety precaution phase.

SITUATIONAL UPDATE - 3/26/24 2:44pm: The City of Cannon Beach has issued a **Boil Water Advisory** as a precaution due to the loss of pressure experienced during the water line break today. This is a precaution only, no known contaminants have been identified.

SITUATIONAL UPDATE - 3/26/24 1:17pm: The water main break location has been identified on the north end of town. Public Works crews are working to isolate the location and restore water service to the remainder of the community. Homes in that immediate area will continue to be without water until the repair can be made, and our crews will provide an ETA for that as quickly as they can excavate and get to the break point. Additional updates will continue to be provided on this post as progress is made.

URGENT COMMUNITY MESSAGE: The city has just experienced a break in our water main that provides water to the community. The Public Works team is in the field trying to isolate the break so that a repair can be made as quickly as possible. You may be experiencing low pressure or no water at this time, please bear with us as we isolate the issue and make the repairs as quickly as we can.

Updates to this post will be added as things progress. At this time, we do not have an ETA for resolution until we can isolate the break location.
